NEW STATES.

Congress adjourned on Saturday, the twenty-eighth ultimo, after a session of eight months duration. Among the last bills passed was one for the admission of Nebraska as a State into the Union, which remains in the President's hands unsigned. The same objections appear to apply to it which applied to the vetoed bill for the admission of Colorado, principal among which is a deficient population.

Strangely enough the Colorado veto was not considered before the adjournment. Although the bill was vetoed two or three months ago, it was permitted to lie without action in Congress, because, as we suppose, a two thirds

for political purposes only does not seem to prosper under Andrew Johnson, and it is well to have the doctrine established that new States shall not be rushed into the Union prematurely and irregularly, to subserve the purposes of agitators and of those who desire to obtain office. It is not pretended that Netain office. It is not pretended that Nebraska has more than sixty thousand inselves to prevent a quorum, thus obstructing business. The Governor cannot manage them with the means at his disposal, and has applied to me for in the old States; but it is more probable that the number of inhabitants does not exceed forty or fifty thousand. The not exceed forty or fifty thousand. The number in Colorado is still less.

STARTLING DISCLOSURES.

THE following is a portion of a letter written by Hon. Henry J. Raymond. Member of Congress from New York. It will command attention from the startling nature of its disclosures.

You may have noticed the passage in the House, a few days since, of a resolu-tion offered by General Payne, of Wis-consin, calling on the States to organize discipline, and equip their militia, and directing that two thirds of the arms, I aths and other lumber; lead in ingois, pigs, or bars; lead, nitrate of; lead, the distributed anoung the load states to take is the states to take place immediately, and that among the States Intelly in rebellion to be postponed. I do not propose to comment upon the result of such a movement. It is obvious that if any such contingency should arise, the war would not be sectional, as was the last; it would be a war of political parties and of neighborhoods. Not only have the great body of the Union party in Congress no sympathy with these views and purposes, but they are in the main ignorant and incredulous of their existence. That the extreme Radicals entertain them, however, there is not the slightest doubt, and we know, from the experience of vote could not be obtained for passing it over the veto.

This manufacturing of new States for realities and we know, from the experience of secession in 1861, how few men it sometimes requires to plunge a great party or a great nation into war.
